

**BATTERY PACK HAVING FLEXIBLE CIRCUIT CONNECTOR****ABSTRACT**

5           A battery pack containing a plurality of battery modules, said modules  
comprising a plurality of individual battery units, said battery units comprising a  
plurality of bicells with opposing terminals. The battery modules are connected in  
series by use of a flexible circuit and by opposing positive and negative terminals of  
each battery unit. The terminals of each battery unit contain a region of apertures  
10       which allow the adhesive of the packaging material to seal more effectively, thereby  
eliminating or reducing the amount of leakage from an individual battery unit.
